Projects undertaken by URI

URI Design Studio is an award winning design and consultancy practice that uses light to enhance the experience of the visual environment.

Our work is wide-ranging in terms of type and scale and encompasses architecture. Today we work with over 30 people drawn from disciplines including architecture, urban design, interior design, art, lighting, set design and landscape design.

Our offices are based in Gurgaon and New Delhi, India

Light is a medium with which I sculpt spaces and bring them to life.

R.B. Thiruvengadam , Founder URI Design Studio

R. B THIRUVENGADAM, FOUNDER

R. B Thiruvengadam received his Bachelors in Architecture from TVB School of Habitat Studies and Masters from School of Planning & Architecture, Delhi.

AASTHA JAIN, ASSOCIATE

Aastha graduated with a diploma in Interior Design from International Polytechnic for Women, Delhi.

PREETI RAWAT, ASSOCIATE

Ms Rawat graduated with a Bachelors in Architecture from DIT, Dehradun in 2022.

Light as Fifth Element

Light is the element with which we see and experience our surrounding. We believe without light there is darkness but there is nothing like absolute dark. There is always presence of light which points out the intensity of darkness. Thus, with our interventions we harness this power of light.

Power of Light

Light is heavy. It weighs in on the environment, people and the built environment. Architecture is a living thing, it starts and it dies. The energy delivered through light lights up the mundane. Light drives our circadian rhythm i.e. cortisol and melatonin are hormones extremely sensitive to light. At Uri, we are advocates for darkness and its place in the environment.

Collaboration

We believe that collaboration fosters good design, productivity and amalgamation of different skills. It facilitates conversation between the user and professionals leading to The Big Idea. It promotes self awareness and helps all participants better their craft.

To see beauty is to see light
- Victor Hugo

Lighting the facade of Writer's Building to bolster its historic presence

Any good lighting fixture is a result of rigorous research and development. URI Design Studio too follows a similar process wherein inspiration is taken from natural forms and a thorough breakdown of the form is done.

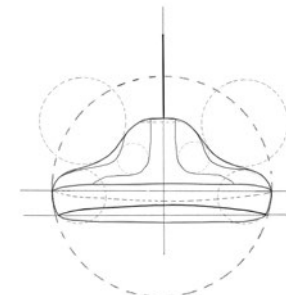

Different materials are experimented with based on the design brief and budget to develop a cost effective solution.

STEP 1.

Conceptual Sketch of Light

STEP 2.

Material and Working of Light

STEP 3.

Final Render

Concept

Each concept carefully considers the experience we create for user alongside image, function and the practical considerations of costs, buildability, ease of maintenance and the sustainability of the design.

Expression

Our primary element of expression is light. However, as designers we explore and communicate our ideas with our clients through sketches, renders, diagrams, amongst other things.

Collaboration

We believe design can only get executed with positive architects, interior designers, landscape architects to develop solutions which add value to the project.

Design Progress

Converting conceptual ideas into drawings and suggestions for lighting equipment and material finishes including concerns and comments by designers and client given at the concept stage. Mock-ups demonstrate the intention and help inform the design process.

Production

Attention to detail throughout the technical design and production process results in comprehensive packages of drawings, specifications and associated documents which are then incorporated into construction documentation.

Execution

Support the execution team, including site assistance, and quick responses to coordination with vendors, automation and installation issues.

PUBLICATIONS

Accolades aren't everything but when a project is awarded by a jury of our peers or singled out for publication it affirms us that the work is rigorous and resonates in the culture of our times.

2021

Nagari Film Competition, CCF: People's Choice Award

Light First, FOAID: Guwahati Residence

Indian Achievers Award: Emerging Company

2019

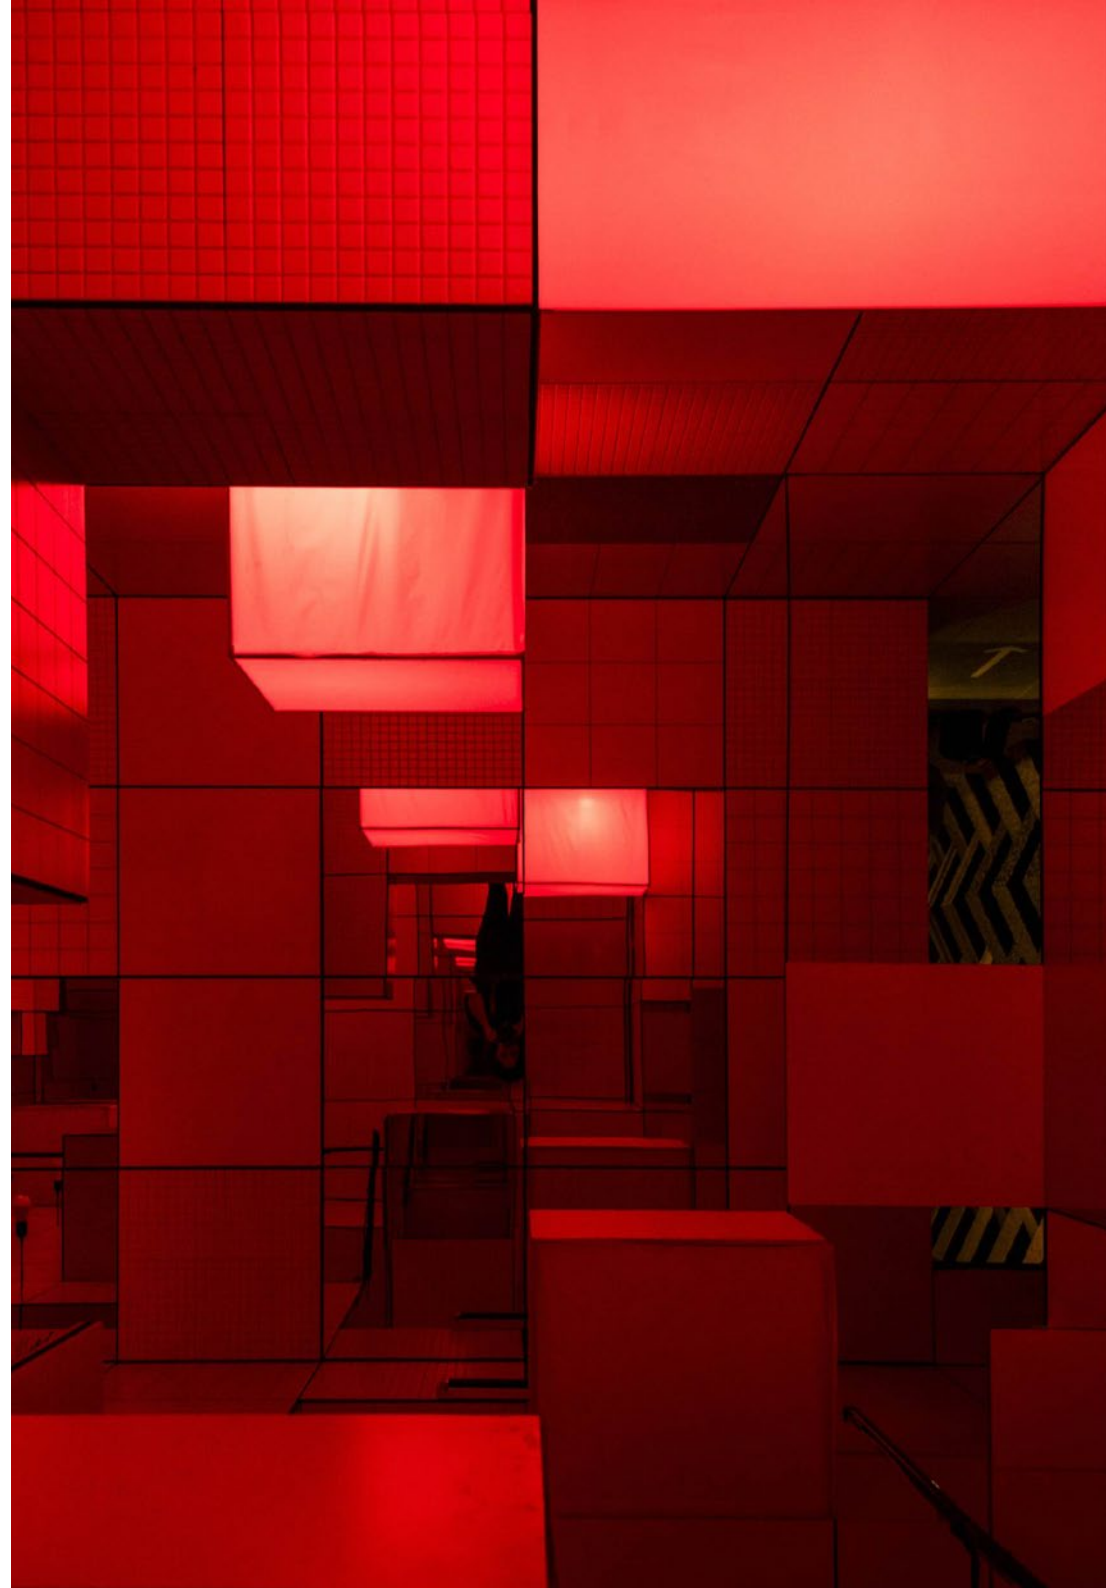

[D]arc awards: Colours of India

[D]arc awards: Klay Tile Studio.
